

## POSTDOCTORAL POSITION IN PROTEIN COMPLEX CRYSTALLOGRAPHY

Applications are invited for a postdoctoral position in **Prof. Miquel Coll's group** at the **Institute for Research in Biomedicine / Institut de Biologia Molecular de Barcelona (CSIC)** to work on the structural characterization of protein complexes. The position is supported by the EU Project 3D-Repertoire ([www.3drepertoire.org](http://www.3drepertoire.org)). A strong background in protein expression is required.

The IRB Barcelona/IBMB laboratories are equipped with state-of-the-art protein expression and purification apparatus, including high-throughput facilities. The crystallographic equipment includes nano-drop crystallization robots, storage and visualization robots, rotating anode generators with image plate detectors, automated sample exchanger and free mounting system, and cutting-edge computational facilities. The Institute is located in the stimulating scientific and cultural environment of the **Barcelona Science Park**.

Those interested should contact (preferably by email):

Martha Elisabeth Brigg  
Secretary  
Structural and Computational Biology Programme  
Institute for Research in Biomedicine (IRB Barcelona)  
Parc Científic de Barcelona, Josep Samitier 1-5  
08028 Barcelona, Spain

Email [martha.brigg@irbbarcelona.org](mailto:martha.brigg@irbbarcelona.org)  
URL: [www.irbbarcelona.org/mcoll](http://www.irbbarcelona.org/mcoll)

Applicants should send a full *curriculum vitae* and the names and addresses (including e-mail address) of two referees no later than **Dec 20<sup>th</sup>, 2007**.
